RENDER

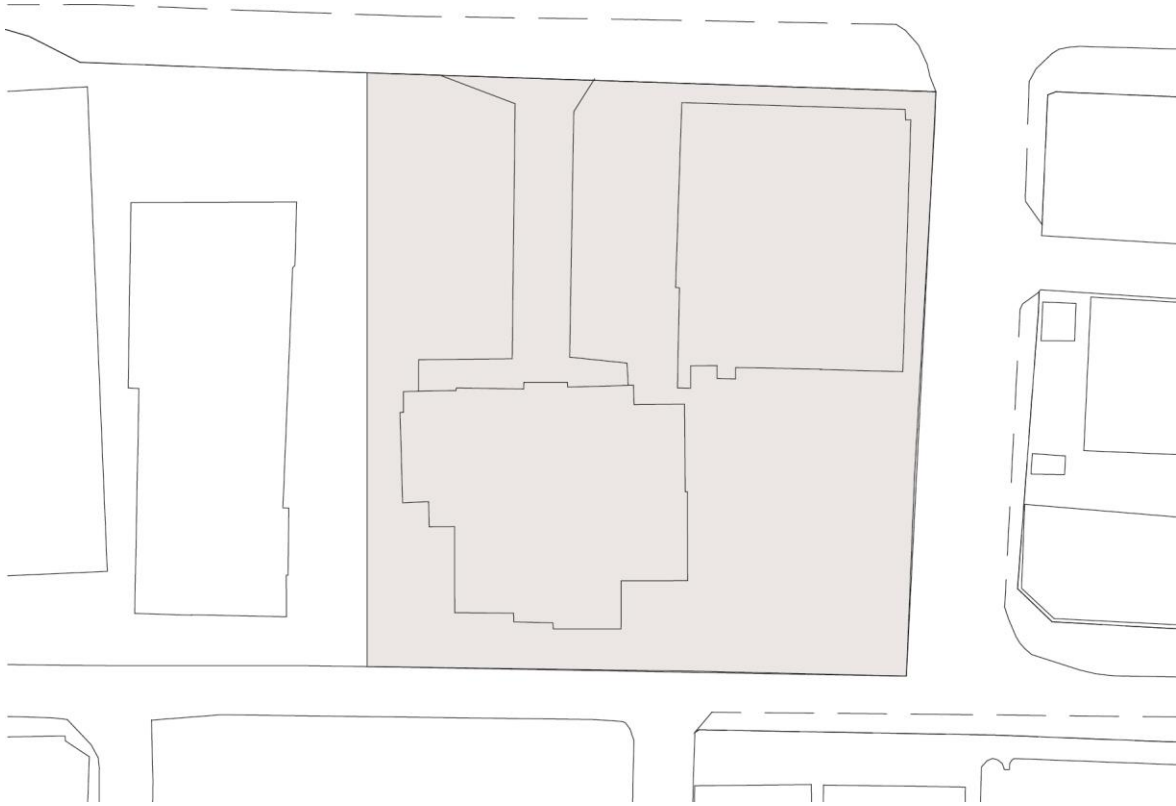

PHYSICAL MODEL

SPC07 Architectural Communication Ability: Ability to communicate architectural ideas in writing and speech, sketch, model, drawing, and appropriately by means of various media

SPC10 Site Planning: Ability to extract a design concept based on the understanding of the various cultural, societal, climatic, and natural (environmental) conditions of the site; analyze and evaluate them systematically; and apply them concretely to the site development (physical conditions. e.g. slope, soil condition, old trees, past cultural artifacts etc.), exterior space [public space] planning, and site planning of the project.

SPC14 Design of Adaptive Reuse: Ability to define conceptual design strategy of adaptive reuse to design renovation of building in response to issues such as evolving social, environmental values, and sense of places. Ability to identify and propose remodeling strategy conceptually, in response to the societal and environmental changes, on the implementation of new values and on the creation of new placemaking in existing buildings; thereby, using this conceptual remodeling strategy as a basis, ability to execute the remodeling design by changing and improving the form and function of the existing buildings.

Site Analysis

Total area: $472.07m^2$

BCR (Building Coverage Ratio)

General Commercial Area --> 60% or less.

FAR (Floor Area Ratio)

Max. Allowed Figure : 800% or less.

BUILDING HEIGHT LIMIT

100M or less

Landscape Plan

$2,069m^2 \times 15\% = 310.35m^2$

Public open space

$3448,6m^2 \times 7\% = 241.402m^2$

Parking lot

$3448,6m^2 \times 1/122m^2 = 28.2672...$

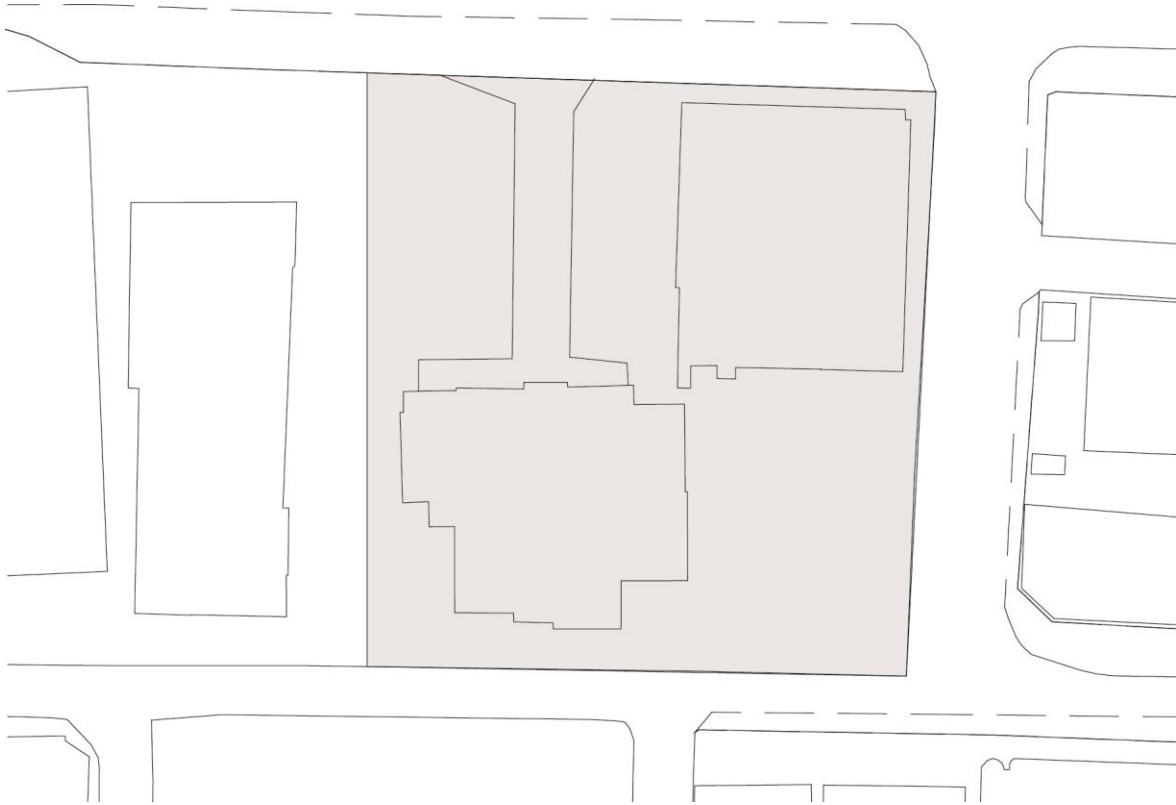

Parking lots for the disabled

$3448,6m^2 \times 1/122m^2 = 28.2672...$

SPC07 Architectural Communication Ability: Ability to communicate architectural ideas in **writing** and speech, **sketch**, model, drawing, and appropriately by means of various media

SPC10 Site Planning: Ability to extract a design concept based on the understanding of the various cultural, **societal**, climatic, and natural (environmental) conditions of the site; **analyze and evaluate them systematically**; and apply them concretely to the site development (physical conditions. e.g. slope, soil condition, old trees, past cultural artifacts etc.), exterior space [public space] planning, and site planning of the project.

Site Analysis

Site Area(대지면적)
->3,448.6 m²

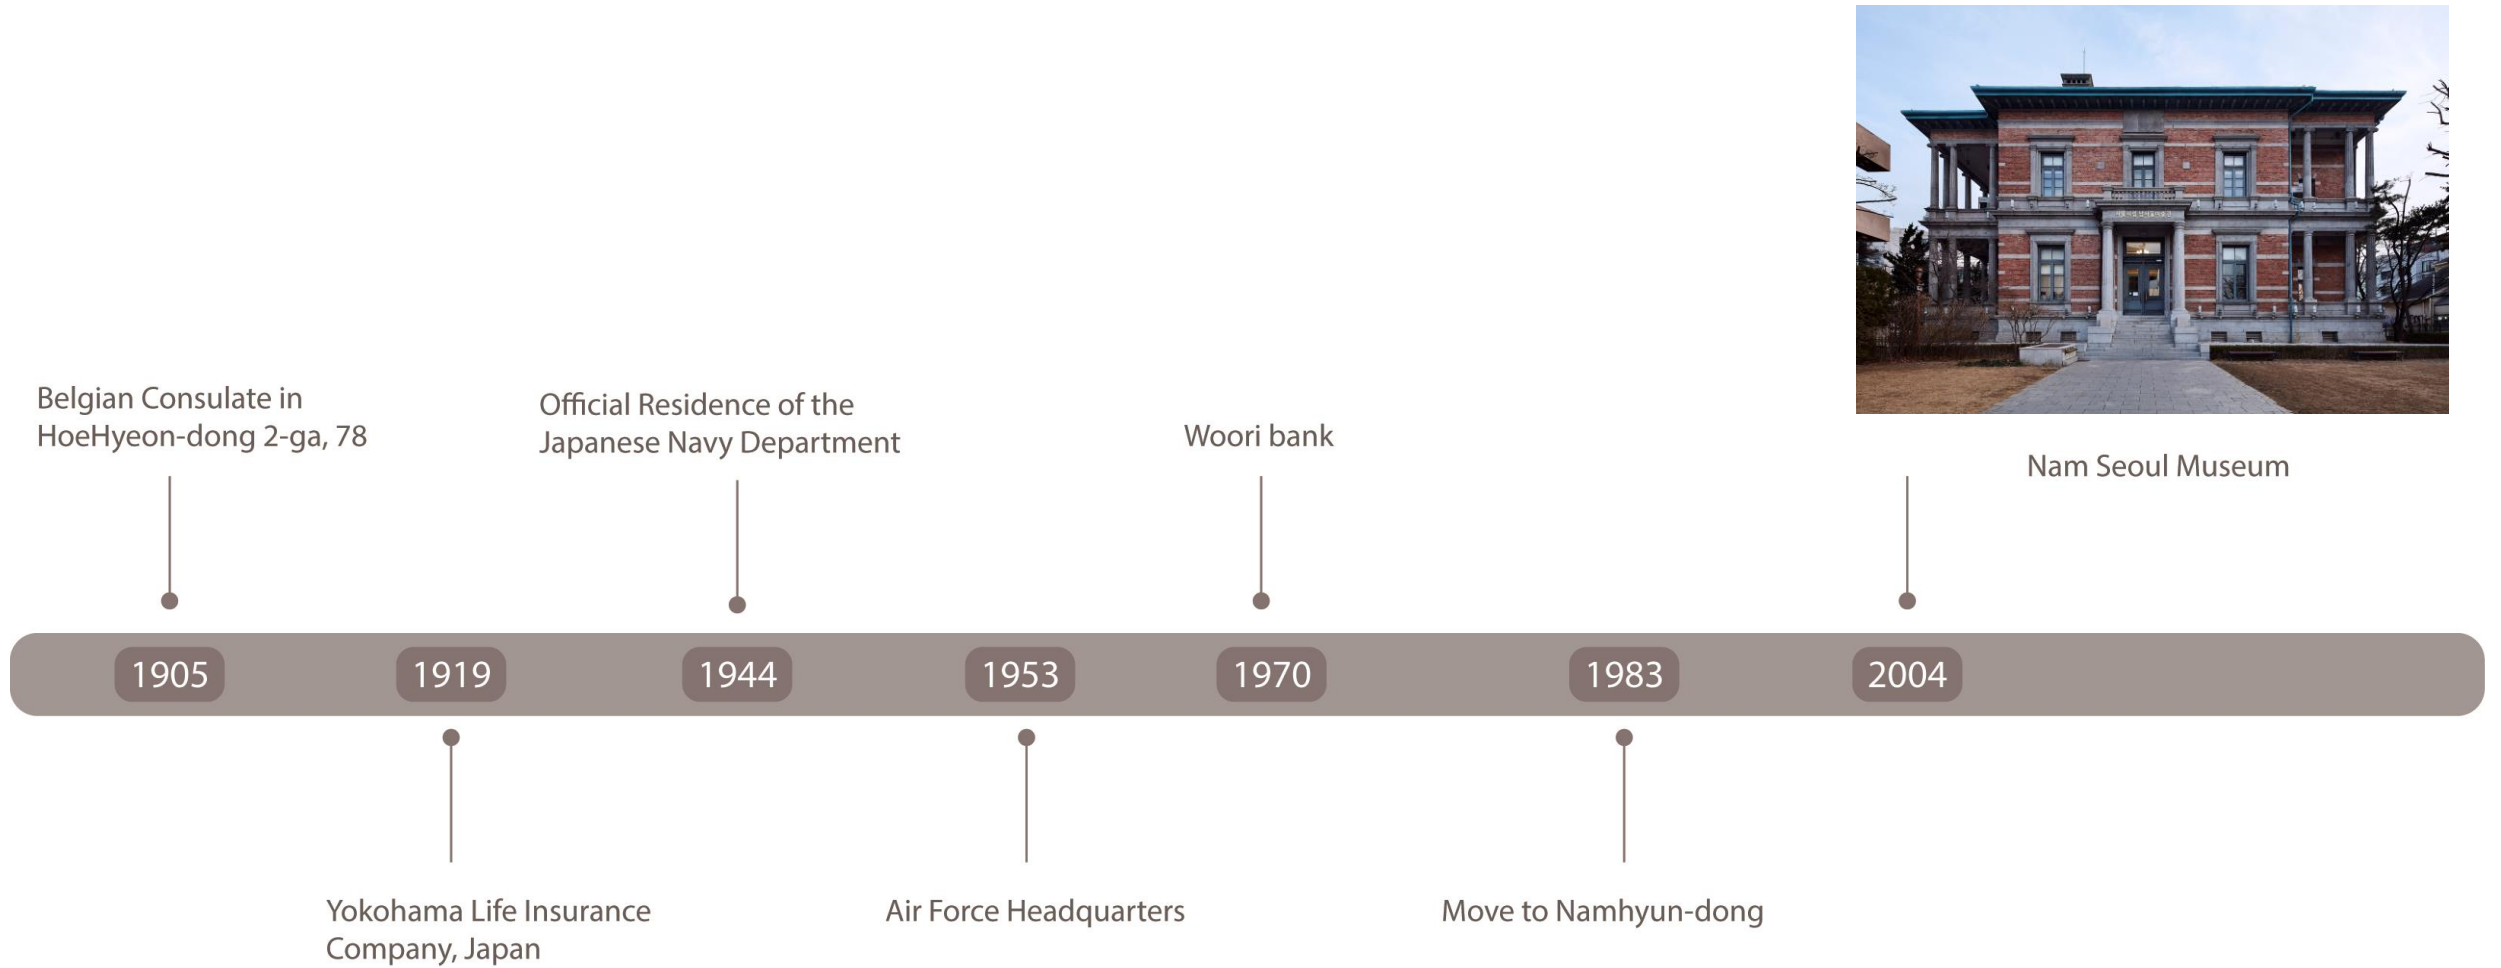

Woori Bank(우리은행 면적)
B1 : 571.9 m²
1F : 565.62 m²
2F : 192.4 m²
3F : 565.62 m²
->Total 1,895.54m²

Art Museum(미술관 기존 면적)
B1 : 527.93 m²
1F : 442.64 m²
2F : 472.07 m²
3F : 126.94 m²
-> Total 1,569.58m²

SPC07 Architectural Communication Ability: Ability to communicate architectural ideas in **writing** and speech, **sketch**, model, drawing, and appropriately by means of various media

SPC10 Site Planning: Ability to extract a design concept based on the understanding of the various cultural, **societal**, climatic, and natural (environmental) conditions of the site; **analyze and evaluate them systematically**; and apply them concretely to the site development (physical conditions. e.g. slope, soil condition, old trees, past cultural artifacts etc.), exterior space [public space] planning, and site planning of the project.

SPC10 Site Planning: Ability to extract a design concept based on the understanding of the various cultural, **societal**, climatic, and natural (environmental) conditions of the site; **analyze and evaluate them systematically**; and apply them concretely to the site development (physical conditions. e.g. slope, soil condition, old trees, past cultural artifacts etc.), exterior space [public space] planning, and site planning of the project.

Concept

-> Main users would be office workers, students, and retired people

SPC07 Architectural Communication Ability: Ability to communicate architectural ideas in **writing** and speech, **sketch**, model, drawing, and appropriately by means of various media

SPC10 Site Planning: Ability to extract a design concept based on the understanding of the various cultural, **societal**, climatic, and natural (environmental) conditions of the site; **analyze and evaluate them systematically**; and apply them concretely to the site development (physical conditions. e.g. slope, soil condition, old trees, past cultural artifacts etc.), exterior space [public space] planning, and site planning of the project.

Program

Museum

- 
1. Temporary exhibition hall
 2. Gallery
 3. Experience room for visitor
 4. Outdoor exhibition
 5. Sculpture Park
 6. Open exhibition hall

For Museum

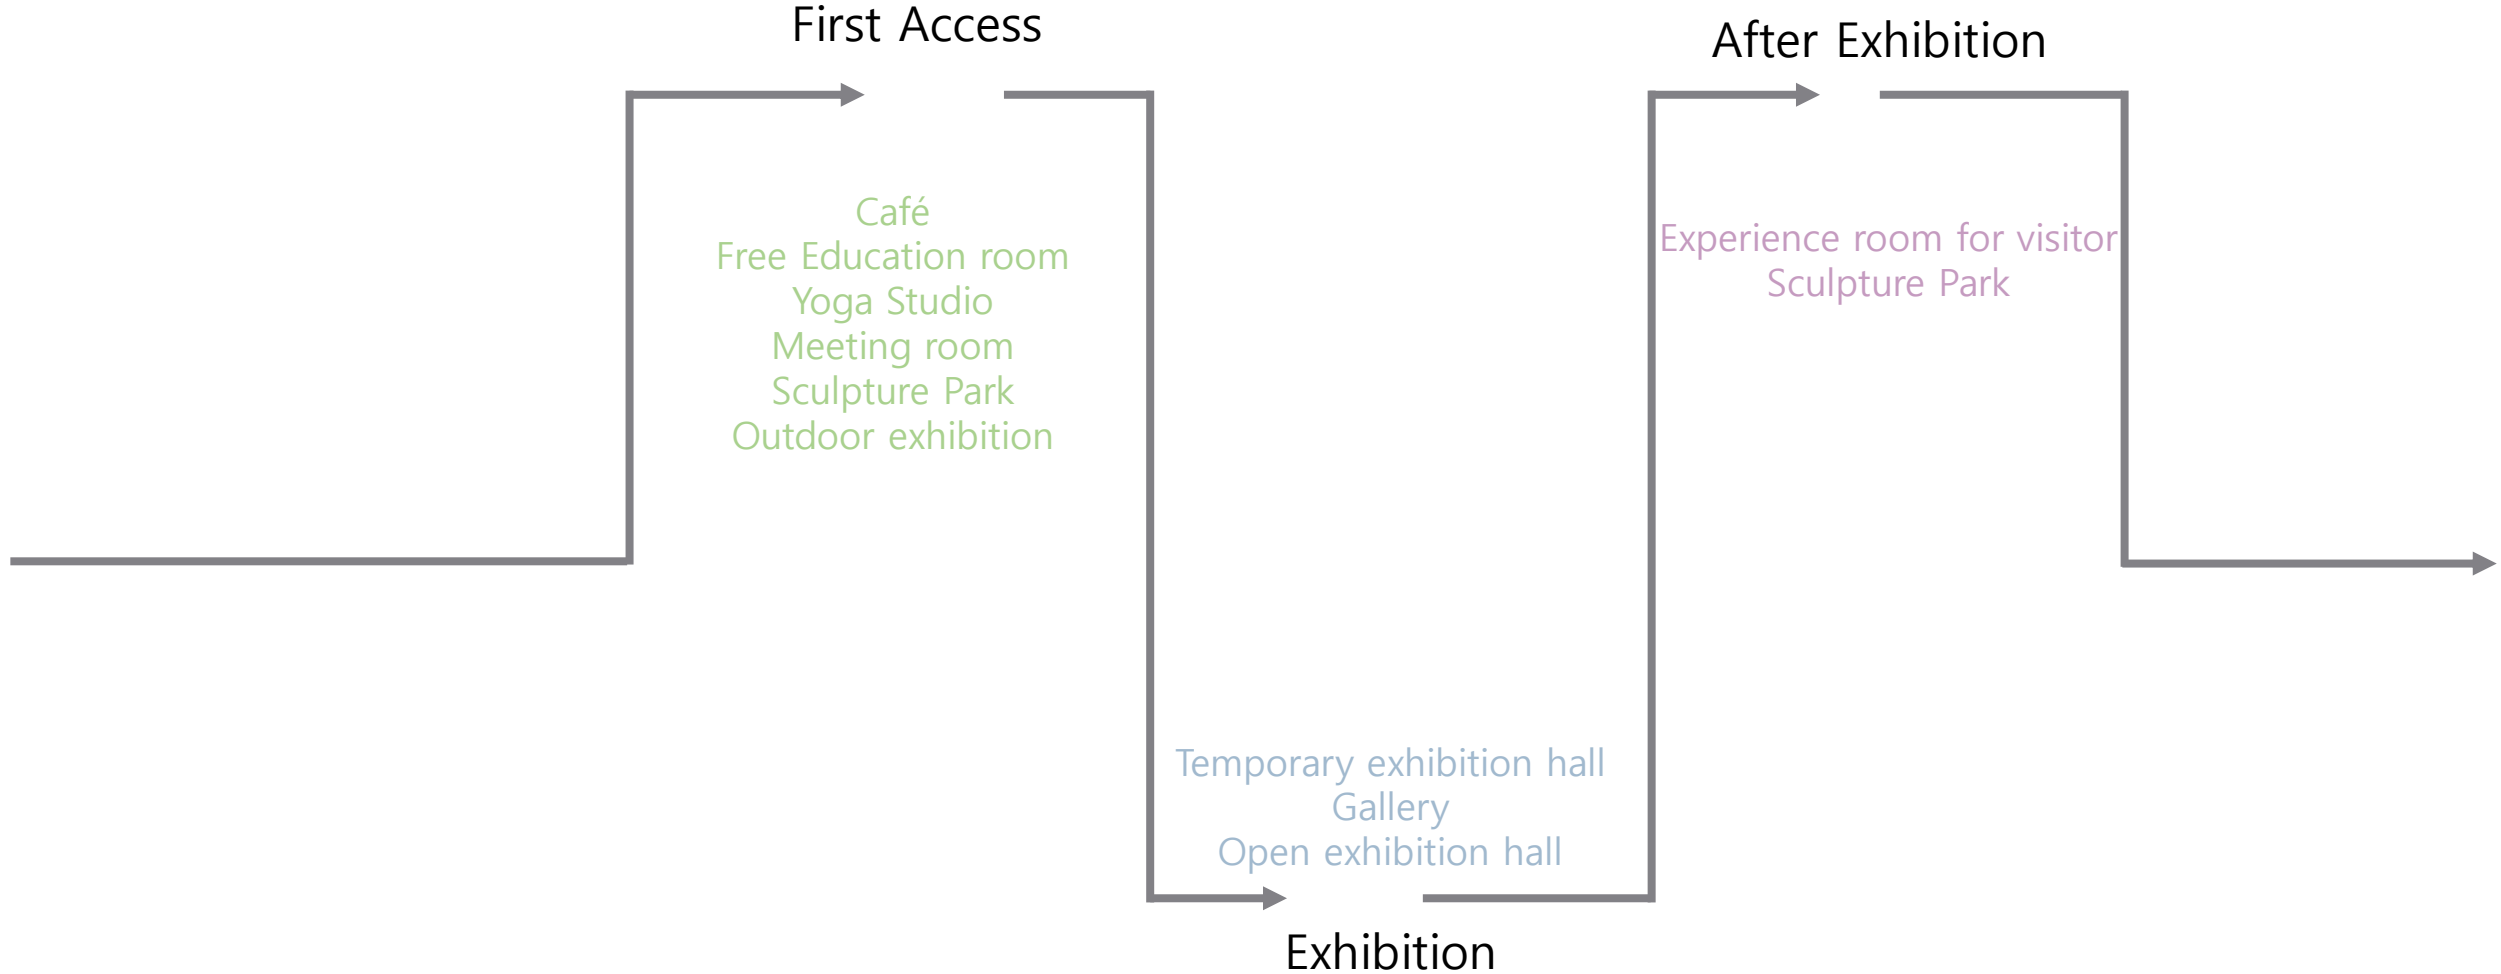

- 
1. Terrace
 2. Archives
 3. Parking area
 4. Office
 5. MEP area

To Attract People(main users)

- 
1. Café(low price)
 2. Free Education room
 3. Yoga Studio
 4. Meeting room

Program

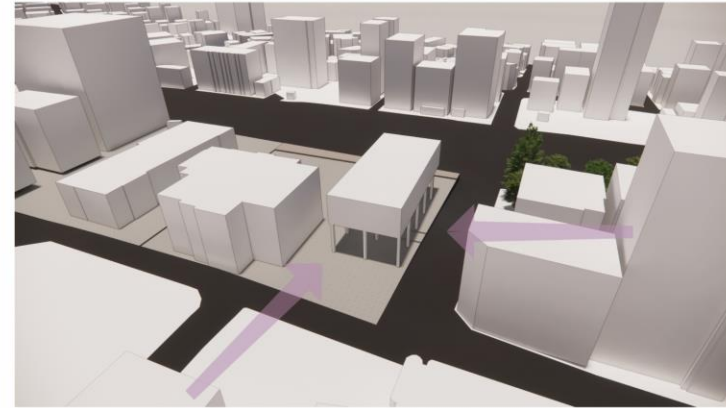

How do people enjoy the museum?
